WHO WE ARE:

- For over **14** years, **The Mold Guys LLC** has managed commercial and residential remediation, specializing in custom-solution to mold removal, inspection and testing, cleanup, and restoration. We are dedicated to discovering and documenting all the contributing factors that lead to microbial damage.
- We build appropriate containment barriers to ensure that contaminants do not spread to unaffected areas while we undertake microbial remediation.
- We use advanced tools and techniques to capture accumulated particulate effectively and efficiently to improve indoor air quality.
- We undergo building restoration that may involve minor repairs and reconstruction from contaminated areas depending on the mold damage level.
- We have 10 years and completely transferable warranty to provide long-term remediation services for mold regrowth protection to avoid degradation to construction materials, compromised structure, and hazardous indoor air quality.

We provide 24/7 emergency service. Smaller projects can be completed in an estimated 3-5 days, and more extensive projects may require up to several weeks for simple treatment and encapsulation
